OBJECTIVE

Eager engineer seeking a dynamic role to leverage my technical skills in both frontend and backend development. Dedicated to delivering results while continuously learning and growing professionally.

EDUCATION

B.Tech - Computer Science And Engineering - 81.16 SVERI's College Of Engineering,Pandharpur	Dec 2021- June 2025
HSC(Science) - 90.50 Shri Sant Damaji Mahavidyalaya Mangalwedha	July 2020 - May 2021
SSC - 77.20 English School Mangalwedha	July 2018 - May 2019

TECHNICAL SKILLS

Programming Languages	C, Core Java, HTML, CSS, JavaScript, Node.js, React.js
Soft Skills	Quick Learner, Teamwork, Work Ethics
Databases & Concepts	Data Structure(Basic),MySQL(Basic), OOP's, MongoDB
Developer Tools	Git, GitHub, VS Code, Linux

TRAINING

Java Full Stack Development : sponsored by symboisis	Feb-Apr[2025]
Completed comprehensive training in Java Full Stack Development, gaining proficiency in both front-end and back-end technologies. Equipped with skills to design, develop, and maintain dynamic web applications using Java and related frameworks.	

INTERNSHIP

Internship – Insta ICT Expert Private Limited	Working
Currently interning at Insta ICT Expert Pvt. Ltd., working on real-time web applications focused on job portals and e-commerce systems. The goal is to gain hands-on experience in full-stack development and modern software practices. Technologies: React.js, Node.js, Spring Boot, MongoDB, Firebase	

PROJECTS

Job Portal Web Application:

Developed a job portal using React.js with Remote API integration to display real-time Software/IT job listings. Implemented search, location, and job-type filters with an OTP-based password reset system and UI inspired by BestJobsOnline. **Technologies:** React.js, Node.js, MongoDB, Remote API

Lab Automation by Human Detection using IOT:

Built an IoT-based smart automation system to control lights, heating, and security through motion detection and image capture. Enhanced safety and energy efficiency using PIR sensors and ESP32-CAM with cloud-based control logic. **Technologies:** ESP32-CAM, PIR Sensor, Arduino IDE, Firebase, Embedded C. Algorithm: Threshold-based motion detection and image capture

Weather Prediction Website using React:

Created a weather forecast website using React that displays current and 6-day weather data for selected cities. Integrated a weather API to show temperature, humidity, UV index, and more in real-time. **Technologies:** React.js, Weather API, Axios, HTML, CSS
